

# Digital Field Mapping: Tools and Workflows to Manage and Exploit Geological Datasets in QGIS

5-DAY PROFESSIONAL TRAINING COURSE  
17 - 21 July 2026, Accra, Ghana

This 5-day course provides practical training in the use of open-source tools for digital geological mapping and field data workflows using QGIS/QField solutions, including GEOL-QMAPS and FieldMove.

Participants will learn practical methods for integrating diverse datasets, structuring digital mapping projects, and applying efficient tools to support exploration, geological fieldwork and post-processing.

## What You Will Learn

- Import & process geological, geophysical, drill-hole and legacy field data in QGIS.
- Build structured digital mapping projects using a predefined GEOL-QMAPS template.
- Practical exercises on transferring mapping projects to the QField environment for field data capture.
- Process field data.
- Update the QGIS database after fieldwork.
- Produce publication- and report-ready geological maps.

## Why Attend

- Hands-on training in QGIS tools tailored for geology and exploration.
- Open-source tools → no licensing fees.
- Practical experience integrating field data with office-based workflows.
- A complete skill set that helps streamline digital geological mapping and improve field data accessibility, consistency and re-usability.
- Learn to work with user friendly tools already widely adopted in the industry.

# Program

Attendees can bring their own dataset to be used as training/demo material.

Day	Course Elements
Day 1	<b>Introduction / Review of QGIS Basics</b> General Introduction and Digital Geological Mapping Solutions Practical 1.1 = Review of Useful Basic QGIS Routines (1/2)
Day 2	<b>Review of QGIS Basics / Geodata import and Visualisation</b> Practical 2.1 = Review of Useful Basic QGIS Routines (2/2) Practical 2.2 = Accessing Data over the Web
Day 3	<b>Import of Different Types of Data Practical</b> Practical 3.1 = Legacy Field Data Practical Practical 3.2 = Geophysical Data Practical Practical 3.3 = Drill Hole Data
Day 4	<b>Preparation of a GEOL-QMAPS Mapping Project</b> Practical 4.1 = Import of Existing Field Data Practical 4.2 = QGIS Mapping Project Customisation Practical 4.3 = Creating Map Themes Practical 4.4 = Export to QField App and Data Collection Test
Day 5	<b>Field Data Processing</b> Practical 5.1 = Import of Field Data to the General QGIS Database Practical 5.2 = Field Data Editing, Visualisation, Processing and Export Practical 5.3 = Geological Map Production and Export Concluding Remarks

## Course Leaders

**Julien Perret:** Research Associate, University of Western Australia (UWA). Lead developer of GEOL-QMAPS, with extensive experience in digital mapping workflows across Sudan, Côte d'Ivoire, Ghana, Sierra Leone, and Senegal. Expert in structural geology, field data integration, and exploration-scale mapping.

**Guillaume Duclaux:** Associate Professor, Université Côte d'Azur. Specialist in tectonics, structural geology, and computational modeling. Research focuses on crustal architecture, 3D geological modeling, and deformation process.

# Information

**Date:**

17 to 21 July 2026 - (includes a Saturday and a Sunday).

**Duration:**

5 days

**Venue:**

Alisa Hotel, North Ridge, Accra, Ghana.

**Time:**

From 8:30 to 17:00 every day,

**Language:**

French and English

**Registration Fees:**

USD 2,250 per attendee. The fee includes morning and afternoon tea, lunch, and training materials. Payment must be completed before the start of the training. Any applicable country withholding taxes will be added to ensure the net amount received is USD 2,250.

**Registration deadline:**

1<sup>st</sup> April 2026

**Certificate of participation:**

Upon completion participants will receive a certificate of attendance.

**Requirements for attendees:**

Prior to the course, attendees have to install the QGIS software on their laptops, and the QField app on their iOS or Android mobile device(s) (smartphone or tablet).

Detailed instructions will be provided closer to the course date.

Attendees can bring their own dataset to be used as training/demo material.

## Opportunity to attend the IASTG Conference 2026

The IASTG Conference will take place in Accra after this training course.

Why not extend your stay and attend the conference? Visit our website for more information.

# Registration

## Digital Field Mapping:

### Tools and Workflows to Manage and Exploit Geological Datasets in QGIS

17 to 22 July 2026 - Accra, Ghana

Registration deadline 1<sup>st</sup> April 2026

Please complete this form and email it to: Corinne.Debat@agate-project.org
