To Whom It May Concern,

LETTER OF SUPPORT FOR STUDENT PARTICIPATION – IASGT CONFERENCE 2026

I write in my capacity as Head of Department to formally support the application of Mr. Alexander Asonkey, an MSc Geology candidate in the Department of Earth Science, University of Ghana, to participate in the upcoming International Association for Structural Geology and Tectonics (IASGT) Conference 2026, to be held in Accra, Ghana.

Mr. Asonkey is currently specialising in **Geoscience / Environmental Monitoring / AI in Earth Systems**, with research focused on the application of artificial intelligence models to carbon capture and storage (CCS) monitoring and risk assessment in near-surface and marine environments. He intends to present a poster titled: **“Using AI Prediction Models for CCS Monitoring and Risk in (Near) Surface and Marine Environments.”**

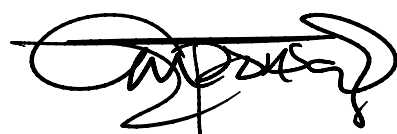

The Department fully supports his participation and presentation at this conference. This provides an excellent opportunity for him to showcase his research, engage with the international geoscience community, and contribute to emerging discussions at the intersection of geoscience, environmental monitoring, and data-driven technologies.

I also confirm that Mr. Alexander is a registered postgraduate student in good standing, and his participation aligns with the academic objectives of the Department.

I strongly endorse his application and respectfully request that he be given full consideration for participation and any associated student support or sponsorship.

Should you require any further information, please do not hesitate to contact me.

Yours faithfully,

Prof. Prince Ofori Amponsah
Head of Department
